

Can You Help Me?

ASCA #N12893

Kutabay's Blue Chip Toby

AKC #DL90828201

Sire: Moonlight's Short Circuit

Dam: Hartke of Kutabay

Are You One of the 92?

Epilepsy Research Update

The good news—there are over 700 Aussies sampled! The bad news—there are a lot of “holes” in families, meaning missing parents, siblings, etc. 92 of the samples are from affected dogs. Toby is one of these, but because of confidentiality, we don't know the identity of the others.

We are asking the owners of the 92 affected dogs to join us in making sure that all of the dogs (both affected and unaffected) related to your dog submit a blood sample to the University of Missouri. It is very important that we have complete family information on these 92 dogs. *Please do everything you can to get the samples submitted from all of your dog's relatives.* Thank you for your help.

If you have a dog affected with canine epilepsy or have a dog related to one, have you given blood yet?
Epilepsy threatens the future of our breed. Please give blood.

For more information about giving blood contact Liz Hansen, Research Coordinator, by email at HansenL@missouri.edu, by phone at 573-884-3712, or by visiting www.canine-epilepsy.net. You may also contact Toby's Foundation by email at tobysfoundation@tobysfoundation.org, by phone at 949-455-7842, or by visiting our website at www.tobysfoundation.org. Contact us. We can help!
